### WELCOME TO THE KIRKWOOD INN AND SALOON!!!!

» Designated a California Historical Landmark, the Inn has a long and rich history. Built in 1864 by Zachary Kirkwood, the building started life as an inn, post office, and restaurant and became a popular stop for weary travelers. Fast forward to the Prohibition Era and the Inn had it made. Being situated at the junction of three different counties, they were able to outsmart local law enforcement by putting a bar on wheels. When one county's law came to call, they simply wheeled the bar into the next county!

» Although it is one of the friendliest place around now, that wasn't always the case. Look closely and you can still see the bullet holes. Oh, and rumor has it, there is also a local ghost. Don't worry. He's friendly!
